

THE BENEFITS OF A HEALTHY ROOF

For optimum durability and beauty, a complete and healthy roofing system requires hip & ridge shingles, ventilation products, shingles and waterproofing underlayment products.

Hip & Ridge Shingles

Owens Corning hip & ridge shingles add extra protection and style to your roof's ridge line. The unique shingle construction also helps protect ridge vents from weathering. Hip & ridge shingles are designed to match our shingle colors to enhance the beauty of your roof.

Ventilation Products

Owens Corning ventilation products help keep air moving through the attic, from undereave vents all the way to the top of the roof, balancing outdoor and indoor temperatures. This helps prevent structural damage due to moisture condensation in winter and excessive heat in summer. It also helps prevent premature aging and deck warping.

Shingles

Owens Corning high-performance shingles are engineered to stay beautiful year after year. They feature a weathering-grade asphalt coating to ensure moisture resistance, and a strong Fiberglas® mat core to ensure structural durability.

WeatherLock Waterproofing Underlayment Products

Owens Corning Weatherlock Waterproofing Underlayment products are scientifically engineered to provide the best protection for a variety of roofing needs. Four uniquely designed waterproofing underlayments provide a solution to every application need.

WEATHERLOCK® P WATERPROOFING UNDERLAYMENT

for Flexible Performance

WeatherLock® P Waterproofing Underlayment

WeatherLock P meets cold-weather challenges without flinching. This product is designed to stay flexible, even when the temperature drops.

- Polyethylene surface and rubberized asphalt combine to provide the flexibility and adhesion necessary to conform around irregular shapes, even in cold weather applications
- Cross-laminated surface with patented raised surface lines adds traction and provides a seal around nails that helps prevent water penetration
- Non-stressed polyethylene surface offers longer exposure without edge curling, while providing a high-performance lap seal
- One of four specifically designed waterproofing underlayments, each engineered to provide a solution to every application need

Construction

Surface:	High-strength polyethylene
Adhesive:	Mixture of Styrene-Butadiene-Styrene (SBS) and asphalt
Removable Backing:	Paper backer

Property

Property	Typical Values [†] (2 sq. roll)
Length:	75 ft. (22.86 m)
Width:	3 ft. (.91 m)
Area:	255 sq. ft. (20.9 m ²)

Applicable Standards & Codes

UL Class A, Class C
Uniform Building Code Tables 15B-1, 15B-2, 15D-1 and 15D-2
ICBO ES ER 4991

Physical Properties

Property	Test Method	Nominal Values [†]
Thickness	—	40 mils
Slip Resistance	ASTM D 1970	Passed
Tensile Strength	ASTM D 412	
Average of Longitudinal (md) and Transverse (cd)		30 lbs/in 28 lbs/in
Elongation at Break (modified bitumen portion)	ASTM D 2523	300%
Permeance	ASTM E 96	.001
Adhesion to Plywood, 40°F	ASTM D 903	2.8 lbs/in
Adhesion to Plywood, 75°F	ASTM D 903	13.6 lbs/in
Tear Resistance	ASTM D 4073	
Longitudinal		58.5 lbs
Transverse		64.3 lbs
Sealability around Nail	ASTM D 1970	Passed
Low Temperature Flexibility	ASTM D 1970	Passed
Waterproofing Integrity after Low Temperature Flex	ASTM D 1970	Passed
Waterproofing Integrity of Lap	ASTM D 1970	Passed
Thermal Stability	ASTM D 1204	Passed

[†]All values are approximate.

†Owens Corning strives to accurately reproduce photographs of shingles. Due to manufacturing variances, the limitations of the printing process and the variations in natural lighting, actual shingle colors and granule blends may vary from the photo. The pitch of your roof can also impact how a shingle looks on your home. We suggest that you view a roofing display or several shingles to get a better idea of the actual color. To accurately judge your shingle and color choice, we recommend that you view it on an actual roof with a pitch similar to your own roof prior to making your final selection. Color availability subject to change without notice.
