

MARKET UPDATE - WEEK OF 9-12-2022

DIMENSIONAL LUMBER

2X4 #2 Western Spruce

Pricing in this table is from mill to wholesale does not reflect local market pricing.

SPF

The market has continued slowly trend down. Look for the market to move soon with a two-week sideways trade in this market in lumber futures.

DOUGLAS FIR (DF)

The long lengths market has remained stable. The mills firmly believe we will see a round of buying sometime in the next few weeks, so they are in no hurry to lower prices.

TREATED LUMBER (SYP)

The market has also remained stable. At this point we don't anticipate any wild runs for the rest of the year, but a mostly quiet tone with a couple of small bumps here or there.

PLYWOOD

7/16 OSB North Central

Pricing in this table is from mill to wholesale does not reflect local market pricing.

OREIENTED STRAND BOARD (OSB)

Market has continued downward for the fourth consecutive week. Cautious would be the accurate term to describe the current panels market.

SOUTHEN YELLOW PINE (SYP) PLYWOOD

The market has been quiet not alot of movement. Sanded and specialty saw a slight increase.

DOUGLAS FIR (DF) PLYWOOD

The market moved down slightly, but has has remained stable.

ENGINEERED WOOD PRODUCTS (EWP)

We are having minimal luck finding any LVL material over any allocated material from manufacturers and distributors. At this point it doesn't sound like the fourth quarter will ease up on availability.
