

## MARKET UPDATE - WEEK OF 2/28/2022

### DIMENSIONAL LUMBER

#### 2X4 #2 Western Spruce

Source: Random Lengths, permission for use here granted by the publisher.

Pricing in this table is from mill to wholesale does not reflect local market pricing.

### SPF

The market continues to push higher. Rail car availability continues to cause supply disruptions. The stud market is very tight and almost impossible to source.

#### DOUGLAS FIR (DF)

Supply is still limited and wades are difficult to find. Mills are still having availability issues on long lengths except for 24' lengths.

#### TREATED LUMBER (SYP)

Pricing is more subdued compared to SPF market. Decking will be tight, after a fire recently destroyed a mill.

### PLYWOOD

#### 7/16 OSB North Central

Pricing in this table is from mill to wholesale does not reflect local market pricing.

### ORIENTED STRAND BOARD (OSB)

OSB is reaching the historic record prices that we saw last summer. Supply is difficult to find and secure.

#### SOUTHERN YELLOW PINE (SYP) PLYWOOD

The market had a slight increase. With the OSB market still questionable, the SYP market continues to be filling the gap.

#### DOUGLAS FIR (DF) PLYWOOD

The market has stayed stable even with supply chain disruptions. The gap between 7/16 OSB and 1/2 4ply continues to narrow and is more accessible than OSB.

### ENGINEERED WOOD PRODUCTS (EWP)

Engineered is becoming increasingly harder to find. Price increases have gone into effect for March with another expected in April.
