

THERMA TRU®
DOORS

Entry & Patio Door Systems

Home begins at the door.

Therma-Tru. You're in expert hands.

Welcome to Therma-Tru, the most preferred brand of exterior doors. Year after year, building professionals rank Therma-Tru #1 – as the brand they use most – in entry doors.* It's a reputation built on more than 50 years of experience and technical know-how. Therma-Tru introduced the world to fiberglass doors and continues to make door systems that are held to high standards for quality and performance.

That's where the beauty of choosing Therma-Tru begins.

Why Therma-Tru® Fiberglass Doors?

Your Therma-Tru fiberglass door system delivers beauty, long-lasting performance and durability.

Beautiful

- Offers endless choices in door styles and handcrafted decorative glass designs.
- Gives the authentic look and feel of real wood.

Low-Maintenance

- Built from a material that won't dent or rust, nor will it warp, split crack or rot.
- Requires less work than wood or steel to keep your door looking "new" longer.**

Energy-Efficient

- Solid polyurethane foam core provides up to four times the insulating R-Value of wood.***
- Most decorative and privacy glass features triple-pane construction for exceptional thermal and acoustical barrier.

Durable & Secure

- Provides homes with weather resistance and security, as well as long-lasting curb appeal.

LIMITED
LIFETIME
WARRANTY

Contributes to an energy-efficient home and is backed by a limited lifetime warranty.

*Brand Use Studies, 2012 *Builder* and 2010 *Remodeling* magazines.

**Visit www.thermatru.com for maintenance and refinishing guidelines.

***Comparison of fiberglass to wood doors (both without glass).

****Not available on certain configurations.

NOTE: See your Therma-Tru representative or visit www.thermatru.com for details on warranties and ENERGY STAR® qualified products.

Top: Classic-Craft Rustic Collection, Augustine. Glass, Doors – CCR804037

Classic-Craft® American Style Collection™ CCA232 with CCA3402SL sidelites and VGRT transom, Villager™ glass, black nickel caming using Cedar stain

Therma-Tru® doors deliver years of trouble-free performance.

- 1 Brickmould** – Decorative moulding used to finish the exterior face of a wood frame.
- 2 Tempered Glass** – Heat-treated for added safety and strength. Two-layered design sandwiches the decorative glass and helps protect it.
- 3 Caming** – Handcrafted metal that helps decorative glass styles take shape.
- 4 Doorlites** – Decorative or clear glass assemblies fitted into the door.
- 5 Sidelites** – Fixed assemblies attached adjacent to the door jamb.
- 6 Transom** – The decorative or clear glass above the door jamb.
- 7 Door Jamb** – The structure that encloses and supports the entire door assembly.
- 8 Hinges** – The metal plates on the door and door jamb on which the door swings.
- 9 Panel** – Embossed or recessed, the decorative section of a door that produces deep shadow lines.

- 10 Sill** – The horizontal bottom frame of a door.
- 11 Weatherstrip** – The seal along the edge of the door jamb to help keep out air and water infiltrations.
- 12 Kerfed Door Bottom** – Attached at the bottom of the door to help prevent air and water infiltrations.
- 13 Multi-Point Locking System** – Optional upgrade that adds greater security by securing the door to the frame in three places.

Polyurethane Foam Core (not shown) – Inside the door panel, offers up to four times the energy efficiency of wood.***

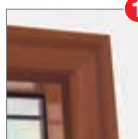

Adjustable Security Strike Plate** (not shown)** – Wraps around the door jamb and helps to protect your home from forced entry.

Engineered Door Stiles (not shown) – Provides increased structural integrity.

Solid Wood Lock Block (not shown) – Provides added strength and security to lockset and deadbolt areas.

Door System Components

We offer a complete door system solution with components designed to work together to provide security, energy efficiency and reduced air and water infiltration for longer-lasting, higher-performing entryways.

1 Brickmould & Jambs

Brickmould and jambs are available that are made of durable rot-resistant material to prevent warping, twisting and rotting.

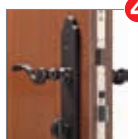

2 Mullions

Mullions are available with a rot-resistant coating on the ends to help prevent moisture-related rot and insect damage. Surface machines, sands and finishes like wood.

3 Hinges

A variety of hinges are available, including heavy-duty hinges with ball bearings between each hinge pivot, or "knuckle," to provide more support, stability and smoother performance. Recommended for Classic-Craft doors and doors with glass.

4 Multi-Point Locking Systems (MPLS)

Stainless-steel, 3-point locking tongue systems provide durability, weather resistance and security. Highly recommended for 8'0" door installations.

5 Weatherstrip

Removable foam-filled compression weatherstrip remains flexible and helps seal against moisture and air infiltration.

6 Corner Seal Pads

Options include the 7-shaped corner seal pad that completes our patented jamb assembly, which creates an air pocket to help prevent moisture and air infiltration.

7 Bottom Sweeps

Available bottom sweeps include a dual-bulb design that works with the weatherstrip and corner seal pad to complement the performance of the sill on inswing systems, helping to prevent moisture and air infiltration.

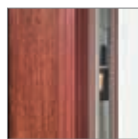

8 Sills

A variety of sills are available, including a composite adjustable sill that allows for an air-tight seal with the door bottom to prevent moisture damage on inswing applications. Natural-looking composite material won't rot, warp or split.

Additional components not shown here:

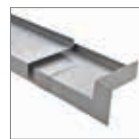

Strike Plates

Astragals

Rain Protection

Sill Pans

Tru-Defense: The Ultimate Protection

Therma-Tru fiberglass entryways are available with our exclusive Tru-Defense system, which integrates specific components engineered and tested to deliver outstanding protection in all kinds of weather conditions. The Tru-Defense system is backed by a warranty rider for homeowner peace of mind. The rider provides for cash reimbursement that may be used toward product or component replacement, secondary damage to flooring and trim, and the labor to make repairs if water infiltration occurs.*

Water Infiltration Cash Reimbursement Limit

Latch and Deadbolt Lock with Standard Assembly: with a Therma-Tru Sill Pan:	\$250 \$500
Multi-Point Lock with Standard Assembly: with a Therma-Tru Sill Pan:	\$750 \$1,500

*For complete details on the Tru-Defense Warranty Rider, visit www.thermatru.com/trudeffense. The rider provides for cash reimbursement in the event water infiltration occurs as the result of product or component failure caused by defects in the door system. Therma-Tru is not responsible for the assembly and installation of the components of Tru-Defense door systems.

Door Collections

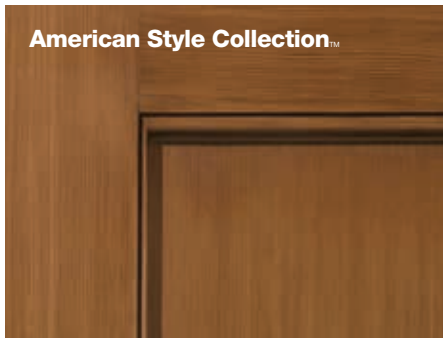

The beauty of a Therma-Tru® door is easy to see, no matter how you look at it. What makes our doors even more beautiful? Choice. Wood-grained, stainable or smooth, paintable surfaces. A world of inspired glass designs. Entry or patio doors. Fiberglass or steel.

Classic-Craft® Collections

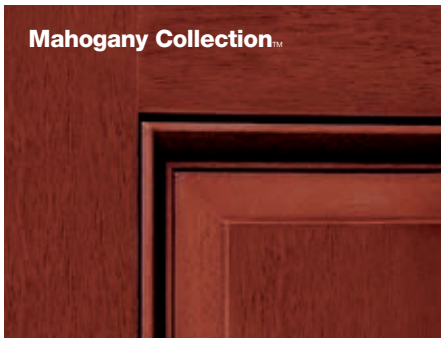

Here's a premium entryway that can truly express your personal style. Whether rustic, classic or contemporary, you'll find a Classic-Craft premium entryway that fits beautifully with your personal style and home.

Fiber-Classic®

The door that started the fiberglass revolution, Fiber-Classic® has stood the test of time graciously and elegantly. With the Mahogany Collection®, you get a trendy style that reflects the move to darker, richer wood tones found in today's home interiors. The Oak Collection® captures the distinctive craftsmanship of natural Oak to match any home's architectural style. With both, you can customize your entryway with doors that embody deep, wood-grain detailing and up to 5 decorative glass options and 4 privacy glass families, as well as clear and clear Low-E glass. Best yet – like all Therma-Tru® fiberglass doors – they are more durable than wood and steel and backed by a limited lifetime warranty for years of low-maintenance performance, safety and security.

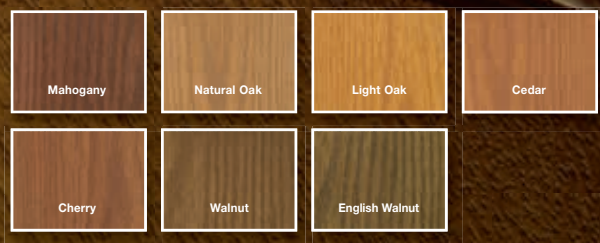

LIMITED
LIFETIME
WARRANTY

On Oak

Smooth-Star®

Sometimes you just want something smooth. Smooth-Star® is the answer if you are looking for all the benefits of a fiberglass door in a sleek, paintable package. A more durable alternative to steel, our Smooth-Star® door is strong enough to take anything life throws at it without the side effects of dings, dents or rust. Their crisp, clean profile in combination with 5 decorative glass options and 4 privacy glass families, as well as clear and clear Low-E glass, makes it easy to customize your entryway. All are backed with a limited lifetime warranty. And, you'll never have to second guess when it comes to the safety of your family because our Smooth-Star® doors received the highest level possible in the industry's toughest forced entry test.*

Privacy Glass

Glass Privacy Rating Scale

For consumers who want it all – natural light, elegant designs and privacy – our privacy glass collection is the perfect solution.

The four designs are universal to virtually every one of our doors and sidelites, delivering a portfolio of privacy glass that's unmatched in the industry.

This translates into a flexible assortment that's an affordable alternative to clear glass and opaque doors.

Our Storm Door Features:

Whether you prefer a traditional, contemporary, elegant, or informal look, there is a Seal-Rite style and color that's just right for you. Years of testing and product refinement have gone into the development of the Seal-Rite Storm door. For strength and beauty no other storm door comes close. Here are some key features that make our storm door stand apart from the competition!

1 Heliarc-Welded Corners

Our **Heliarc-Welded Corners** are the foundation of every Seal-Rite Storm Door. Unlike conventional doors with screw-type corners, Seal-Rite's corners are the strongest spots on the door, giving you maximum strength and durability.

2 Interlocking Hinge System

Our **Exclusive Interlocking-Hinge System** is "guaranteed not to fail!" Our four-hinge tubular design interlocks into the door frame. It eliminates any tendency of the door to pull away from the frame, which traditional hinges don't prevent. Bronze bushings, held in place with heavy steel pins, provide extra durability. This hinge system is so strong that it has been tested to withstand **over 600 lbs of torque and the door still swings without binding!** Above you can see the "Hinge Killer" test!

3 Brush-Type Weather Seal

Our **Brush-Type, Adjustable-Bottom Weather Seal** is similar to the type of weather seal found on many commercial doors. With its non-shrink design, it won't bind, twist or tear as most traditional vinyl sweeps do. It costs us a little more, but it's worth it!

4 Wind Strap Our Fold-Back Wind Strap

replaces the bother-some, noisy chains found on most doors.

5 Door Screen Tension Clips

Our **Door Screen Tension Clips**

provide all the strength needed to keep your screen from bowing and getting baggy. Most competitors use screen bars across the center of the door which results in an obstructed view!

6 Mortise Lock

Our **Mortise Lock** offers superior strength and security. Our Mortise Lock is offered in Brass and Satin Nickel finishes.

7 Adjustable Hydraulic Closer

Our **Adjustable Hydraulic Closer** will provide you with many years of smooth, non-jarring closing action. Most other products are air closers that often times run out of air before the door is fully closed.

Color Options

Finishing Touches

All Seal-Rite Storm Doors come with durable, lock-able handles. We also offer a variety of optional handles for a customized, distinctive look.

Our mortised mechanism offers superior strength and security. Our **Mortise Lock** is offered in Brass and Satin Nickel.

Pull Handle is offered in Brass, Antique Brass, Satin Nickel and Oil Rubbed Bronze

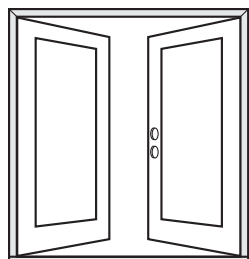

Curly Lever is offered in Black Chrome, White, Brass, Satin Nickel and Oil Rubbed Bronze

3. Select a door category

Fiber-Classic® Fiberglass Hinged Patio Door Systems

You want the very best for your home. We proudly present Fiber-Classic – our premium fiberglass hinged patio door system featuring a natural oak grain without any of the drawbacks of wood like cracking, splitting, or warping. Its rugged exterior resists dents, dings and damage with exceptional durability. Adjustable sill and Low-E glass are just a few of the standard features. The full system is backed by a lifetime limited warranty.

Smooth-Star® Fiberglass Hinged Patio Door Systems

Is a smooth painted look more your style? A Smooth-Star hinged patio door system offers a smooth surface with crisp stile and rail lines like a painted wood door. The durable fiberglass surface provides the strength of steel that resists dings and dents. Smooth-Star hinged patio doors feature an adjustable composite sill and Low-E glass, making these units virtually trouble-free and energy-efficient. The full system is backed by a limited lifetime warranty.

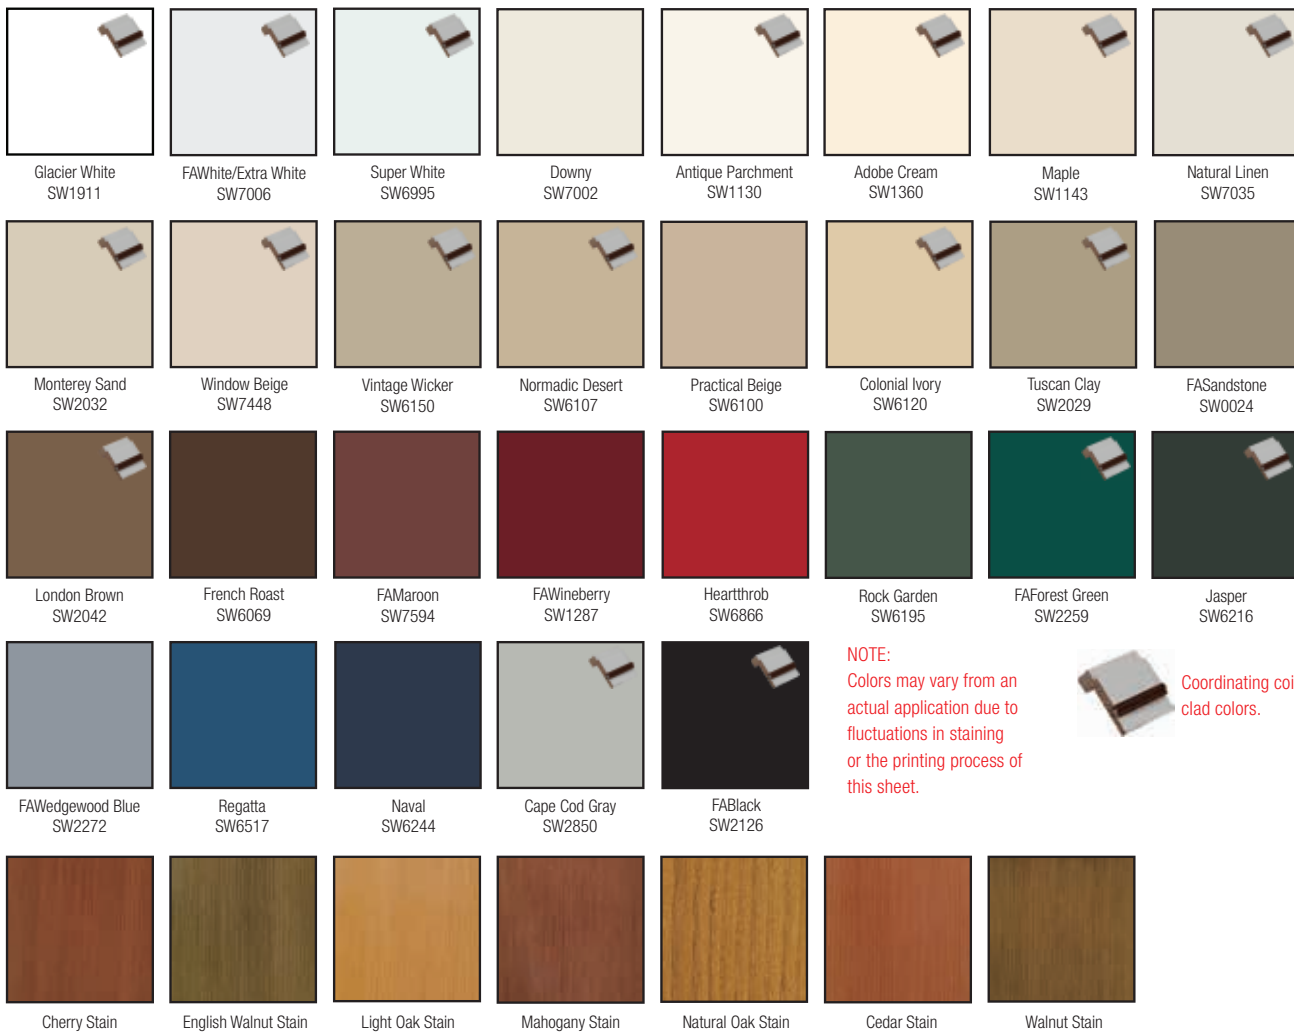

Steel Hinged Patio Door Systems

Get into the swing of the hard working steel hinged patio system at an attractive value. Therma-Tru's system design assures years of smooth operation. The Steel Hinged Patio Door System offers a limited 5-year warranty.

Paint Options

Paint can be applied to Classic-Craft®, Fiber-Classic®, Smooth-Star®, and Traditions Steel. Stain is for Classic-Craft® and Fiber-Classic® only.

Coil Clad Door Jambs

- Aluminum trim coil with a PVC coating
- Protects exterior door jamb from weather
- Available in 18 stock colors
- Less maintenance than a painted or stained wood jamb

Frontline® Deluxe Clad System

NOTE:
White and Sandstone are stocked.

Additional colors available by special order.

Rot Proof Jambs

Optional Rot-Resistant jambs prevent moisture and insect damage to door frames.

Rot-Proof Primed—

Finger-jointed Alaskan Cypress ends prevent moisture from wicking into the frame and are easily sanded and finished.

Full Composite—

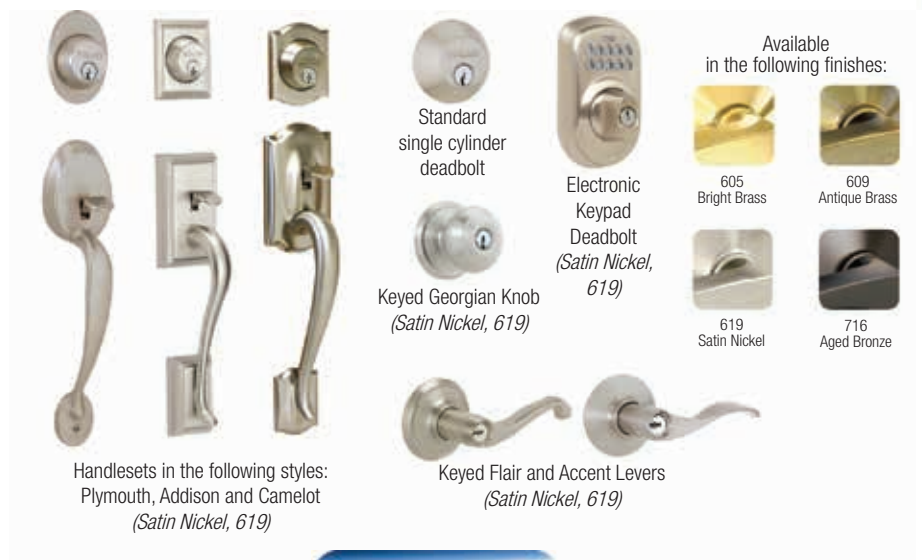

Choose from a Smooth or Woodgrain Texture featuring a closed Cellular Structure to ensure the frame will not absorb or wick moisture, and prevents warping rotting and splitting. Twice the Screw holding power of traditional wood frames.

The Limited-Lifetime Warranty on both rot-proof jambs pairs well with the Therma-Tru system warranty.

Real Security. That lasts a lifetime.

Seal-Rite is proud to sell Schlage products. Schlage's rich heritage in residential and commercial security can be found in every product they make. When you safeguard your home and family with Schlage, you ensure security as well as peace of mind. With Schlage, you benefit from nearly a century of total dedication to security, quality and innovation.

About Us

For more than three decades, Seal-Rite has been passionate about creating ways to Add Value... Our goal is to continue to find ways to respond with: "Yes, we can." Our passion and dedication is ever present in all of our value-added products and services we offer today.

Whether it is a single door, large project or the most complex custom order, Seal-Rite has the people, knowledge, and unequaled abilities to service your needs. We carry one of the largest inventories of Therma-Tru® products and pre-finish more doors than most other companies in the industry, combined. We can even complete the entire entry package with our high-quality Storm Doors and Schlage Locks. All of which is available online 24/7 through our state-of-the-art Seal-Rite Product Configurator/Pricing Tool.

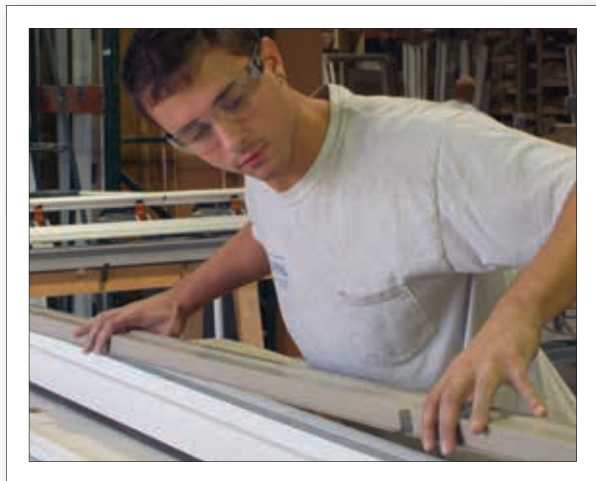

All of us at Seal-Rite continue to build on our passion, and we offer our customers the knowledge, abilities and confidence of over 30-years of dedication to Adding-Value...

Before

Increase Curb Appeal and Value

We all want to get the most out of every dollar we spend, and installing an attractive new front entryway is a cost-effective way to improve your home's curb appeal and perceived value. In fact, a study conducted by an independent research company found that a home with an enhanced Therma-Tru® entry door system added to its perceived value by as much as five times the cost of the door itself.*
